Delegate Feedbacks

"The overall session on digitizing Linux workloads using Azure, along with discussions on AI innovation, was beautifully articulated by the Microsoft team. It provided valuable insights into new areas and effective workload management strategies. A very informative and engaging session!"

Jitendra Maan
Head - Artificial Intelligence & Cognitive Experience,
EGG Software & Service, TCS

"It was a fantastic event—very engaging and insightful. I discovered some exciting new features from Microsoft and AMD, particularly around Azure. The session provided valuable insights into how Azure leverages Linux for its solutions. An amazing experience overall!"

Ritesh Kumar
AVP - IT Applications, Exl Service

"It was very interesting to learn how Microsoft is utilizing Linux as an operating environment in collaboration with AMD. They are developing some truly innovative solutions for their customers. I really appreciate the impressive work being done."

Tejveer Bhogal
Head - Governance Alliances & PMO, BCCL

"The session was very useful and informative, focusing entirely on Microsoft's open-source-based initiatives. The collaboration between AMD, Linux, and Microsoft is impressive and promises to be a fantastic journey ahead."

Bhagat Singh
Head - IT, M2K Group

"The session was very informative. At our company, we are extensively using Azure, and the explanations provided during the session were excellent. We look forward to leveraging Azure for the AI segment as well."

Manoj Kumar
CIO, Ambica Steels
