Delegate Feedbacks

"Reflecting on the session, I would say the concept of a future-ready enterprise is one that embraces everything. The format, with four different discussion panels covering various aspects, was a very new and refreshing approach."

Subhash Singh Punjabi

CISO, Deepak Fertilizers

"It was a very good session, conducted wonderfully and in a well-structured manner. You could say it was like a roundtable discussion, where everyone had a chance to contribute."

Yogesh Patil

Associate Delivery Head - Network & Security, Bajaj Allianz General Insurance Company

"Regarding the event, we focused more on SD-LAN. In the BFSI sector, many branches currently rely on traditional LAN connections that are dependent on service providers and are not fully secure. With Tata Communications introducing SD-LAN (Software-Defined Local Area Network), enhanced security and micro-segmentation are now possible. This will be highly beneficial for the entire BFSI sector and especially valuable for my organization in the banking industry."

Yogeshwar Nakka

Senior Manager, Bank of Maharashtra

"This was wonderful, very informative and a valuable addition to the new platform that is."

Ardhendu Shekhar

Chief Manager, Bank of Maharashtra

"The event was excellent, offering valuable insights into new technologies and providing a great platform to connect with industry leaders and peers."

Prasad Kadam

Manager - IT & Networks, Deepak Fertilizers

"The session on the future-ready enterprise and network fabric was very informative. Although it was quite exhaustive, it was conducted in a well-structured manner, with participants sharing insights through one-on-one interactions."

Radhakrishna Gaitonde

Chief Manager, Bank of Maharashtra
